

Salt Lake Community College  
Math 1060 Final Exam - Fall Semester 2009

Name: \_\_\_\_\_

Instructor: \_\_\_\_\_

---

This exam has three parts. Please carefully read the directions for each part. All problems are of equal point value. Students are NOT allowed to use books or notes.

**Part I** – You must complete this portion of the test without using a calculator. After you have finished part I, your instructor will give you the remaining parts of the exam.

When simplifying answers, it is **not** necessary to rationalize denominators.

---

1) Find the exact values of all trigonometric functions for an angle  $\alpha$  in standard position whose terminal side contains the point  $(-3, -2)$ .

$\cos \alpha$  \_\_\_\_\_

$\sec \alpha$  \_\_\_\_\_

$\sin \alpha$  \_\_\_\_\_

$\csc \alpha$  \_\_\_\_\_

$\tan \alpha$  \_\_\_\_\_

$\cot \alpha$  \_\_\_\_\_

2) Find the exact value of each expression. If the expression is undefined, say so.

a)  $\tan\left(-\frac{7\pi}{6}\right)$

b)  $\csc(2\pi)$

c)  $\sec(45^\circ)$

3) The position  $x$  of a weight attached to a spring is given by

$$x(t) = 4\sin(t) + 3\cos(t)$$

where  $t$  is time in seconds. Find the exact position of the weight at time  $t = \frac{7\pi}{3}$  seconds.

4) Write an equation of the form  $y = A\cos [B(x - c)] + D$  whose graph is give below.

5) Determine the amplitude, period, phase shift, and frequency for

$$y = -3\sin\left(2x + \frac{\pi}{2}\right) - 1$$

Amplitude = \_\_\_\_\_

Period = \_\_\_\_\_

Phase Shift = \_\_\_\_\_

Frequency = \_\_\_\_\_

6) Use identities to simplify the following expression.

$$\frac{(\cos x \tan x + 1)(\sin x - 1)}{\cos^2 x}$$

7) Prove that the following equation is an identity.

$$\tan^2(-x) - \frac{\sin(-x)}{\sin x} = \sec^2 x$$

8) Find the exact value of the following expression.

$$\sin 40^\circ \cos 10^\circ - \cos 40^\circ \sin 10^\circ$$

9) Use an appropriate identity to find  $\cos \alpha$ .

$$\cos 2\alpha = -\frac{1}{3} \text{ and } 180^\circ < 2\alpha < 270^\circ$$

$$\cos \alpha = \underline{\hspace{2cm}}$$
